ABOUT ME

Self-motivated and dedicated software developer with 2 years of professional experience and over 5 years of continuous learning, primarily focused on JavaScript.

While I have explored other programming languages such as Python, C, C++, C#, Java, and PHP at a basic level, my expertise lies in backend development with Node.js and Express.

With a solid understanding of CSS and frontend basics, I excel in logical problem-solving and delivering backend solutions that meet business requirements. Passionate about continuous learning, I thrive in project-based environments that challenge my analytical skills.
